The Research Hub @ Health Sciences Library is part of a collaborative effort with Davis Library (launched in October 2014) and Kenan Science Library to better support researchers in the Carolina community. This initiative is a direct result of the University Libraries Strategic Plan, 2013-2018.

Librarians in the Research Hub @ HSL are your partners at every stage of the research process, specializing in services for researchers in the clinical and biomedical sciences.

**Hub Mission**
- Foster researcher success by providing active support throughout the research lifecycle.
- Strengthen partnerships with campus units working in research support.
- Provide researchers and research team technology-enabled spaces, librarian expertise, and informative programming that will enhance their ability to collaborate.

**HSL Timeline**
We’re currently finishing renovations to spaces on our second floor which will be completed this month. The grand opening event is set for early March.

**Core Hub Features**
- Skilled staff to support research
- Workshops and trainings geared at researchers
- Spaces for consultation, collaboration, and presentation
- Events that showcase faculty and student research
- Networking opportunities for colleagues across and beyond campus to connect

**HSL Services**
- Liaisons are seen as a go-to resource for finding collaborators in other schools to explore new research opportunities.
- HSL offers consultations and training on research tools and software, and to help researchers in every stage of the research process.
- HSL provides assistance in finding research funding and setting up funding alerts.
- HSL Librarians share their expert knowledge of systematic reviews, especially the rigorous search process, with researchers.
- HSL Librarians consult with individual researchers and can even partner with a grant-funded research team to support data management planning or to retrieve impact measures for research publications.
- HSL librarians provide ongoing support to help researchers comply with new reporting requirements (i.e. NIH Public Access Policy)
