UNC MEDICAL CENTER
UNC Medical Center is a public academic medical center that provides patient care, educates health care professionals and advances medical research in partnership with the UNC School of Medicine. With more than 800 beds, the medical center in Chapel Hill comprises N.C. Memorial Hospital, N.C. Children's Hospital, N.C. Neurosciences Hospital and N.C. Women's Hospital.

NC AHEC
The nine regional AHECs enable statewide community-based training for health professionals. They facilitate the teaching of medical, nurse practitioner, physician assistant, certified nurse midwifery, and UNC-Chapel Hill PharmD students in 1,382 community sites and with more than 2,180 individual preceptors across the state.

Institute for Global & Infectious Diseases
UNC-Chapel Hill is committed to improving health in North Carolina and around the world. The Institute for Global Health & Infectious Diseases at UNC seeks to advance this goal by promoting global health research, teaching, and service activities across campus. IGHID recognizes that the most pressing health challenges and emerging diseases know no boundaries. As citizens of a globally interconnected world, health problems around the world affect us here at home.

CHIP
The Carolina Health Informatics Program is an interdisciplinary research and training program committed to improving health through research, data sharing, development, and education. It draws faculty, health care professionals, and students from across the UNC campus to conduct basic and translational research and to offer graduate training in health informatics for scientists and clinicians in medicine, nursing, public health, dentistry, and pharmacy.

School of Information & Library Science
The School of Information and Library Science seeks to advance the profession and practice of librarianship and information science; to prepare students for careers in the field of information and library science; and to make significant contributions to the study of information. Faculty members further these goals by teaching and advisory work; by research and scholarly publishing; and by service to the school, the university, the state, and the professional community.

NC TraCS INSTITUTE
NC TraCS accelerates clinical and translational research from health science to discovery to dissemination to patients and communities. TraCS provides learning opportunities and training for all types of researchers — from junior academics to community advocates — in areas that help accelerate the advancement of translational research.
